MICROTECH

WELCOME MESSAGE

Expertise, service & accountability.

If you were involved in I.T. for a small to medium business in the early 2000s, you'll probably remember that there was a huge gap between the standard of support you received when compared to the larger corporations.

It didn't matter what managed I.T. solutions company you chose, if your business was not "big", there would always be a few things missing... like technical expertise, consistent service and accountability. But then, in 2008, our founder and director changed all that.

Eng. Ahmed Samy grew so tired of the differences in I.T. service between big and small business, he decided to prove it didn't have to be that way... and National I.T. Solutions came to be.

About Us

Succeeding Together

Employee ownership – fueling our innovation, strengthening your business.

IT Solutions takes a different approach than most IT companies. At Microtech ITS, every employee doesn't just act like an owner, every employee is an owner. Not just through stock options or public stock that anyone can buy. Microtech ITS employees own actual stock in the business through our Employee Stock Ownership Plan (ESOP). When Microtech ITS succeeds, they succeed. And every Microtech ITS employee knows that Microtech ITS only succeeds when our clients succeed.

Improve

Supporting the local and global community.

Helping others to thrive, no matter what their circumstances. We couldn't agree more. The continuing success of National I.T. Solutions is not a reward in our eyes, but a responsibility. So as long as our doors stay open, we'll be giving back to our community and those less fortunate than us through a range of donation and support programs.

Giving local & global assistance, where it's needed most. We're proud to be supporting World Vision, the children's charity Variety, and Victorian Wheelchair Sports. To find out more about our work with these fantastic organizations, click the logos below.

Choosing The Right I.T. Company

Choosing the right I.T. provider is vital when it comes to the future of your business.

Datacenter Infrastructure

Resilience

Allowing concurrent maintainability, a Microtech modular datacenter is built to Tier 3 levels of resilience as standard with dual distribution paths and N+1 components.

Financial

Owing to the scalable properties of a Microtech modular datacenter, additional IT space can be added when necessary to match demand.

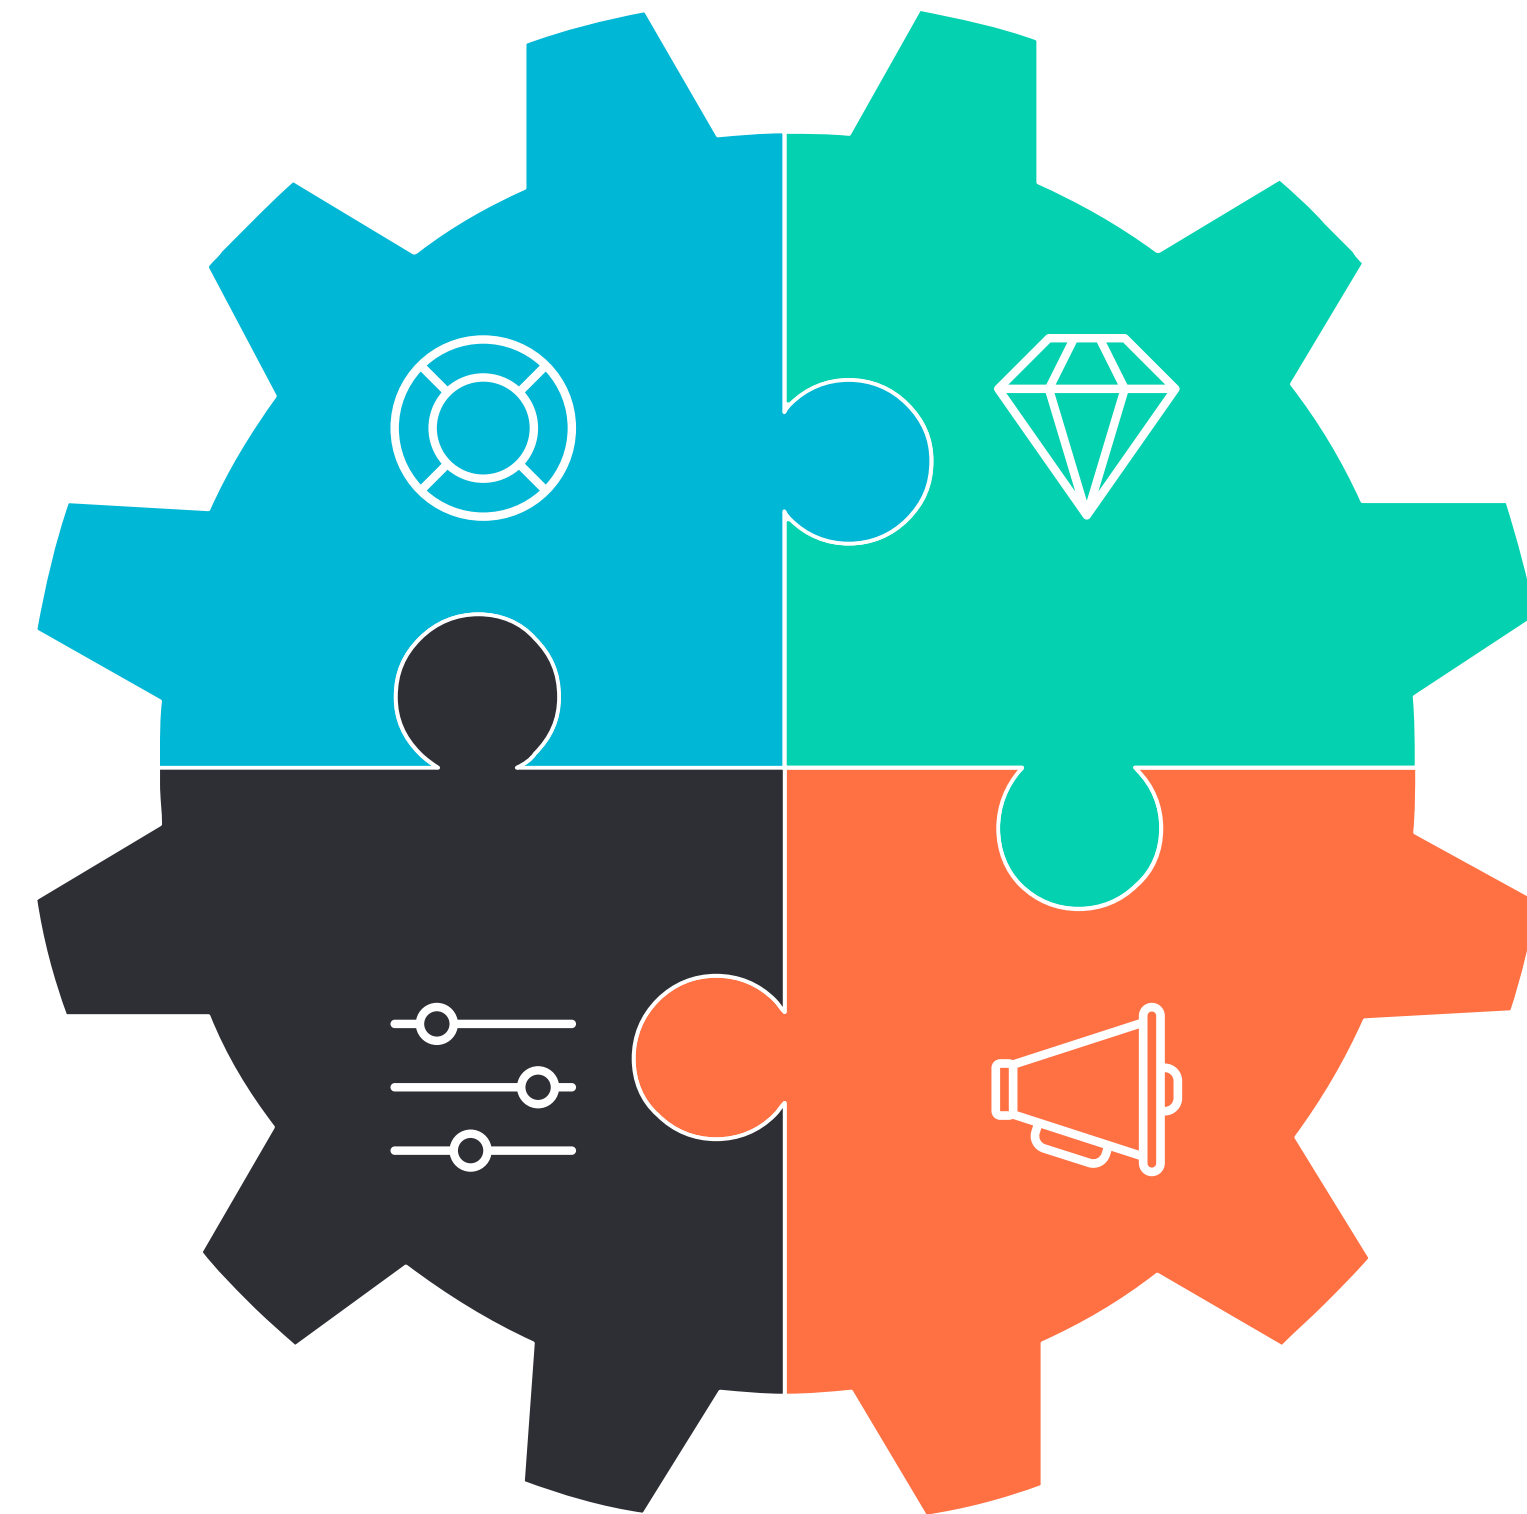

Low proven PUE

Extremely energy efficient, the Microtech modular datacenter system offers a low proven PUE. Tested and verified

Low, medium and high rack kW densities

Rack densities from 1 to 24kW+ are available. No special rack or cooling equipment is needed to achieve the highest densities because the system matches server demand to cooling
